Sophia Simões Gonçalves

Staff QA | Spec QAE | Engineers @Pagar.me | Trans |
Itaquaquecetuba, São Paulo, Brazil

Summary

Staff QA Engineer with 10+ years building quality strategies for high-scale fintechs and payment systems. I specialize in AI-augmented testing, DevSecOps integration, and cost-optimized CI/CD pipelines. My recent work reduced testing infrastructure costs by up to 50%, implemented static security gates (Sonar, MobSF, SDAT), and deployed autonomous AI agents (CrewAI, n8n, local LLMs) to automate ~70% of basic/intermediate test scenarios. As a technical leader, I've mentored 7+ QA engineers across career stages—guiding one from Junior to Manager, advancing three to Mid-level, and currently coaching three Seniors on test architecture and strategic quality thinking. I'm open to Principal/Staff, Quality Architect roles, or strategic freelance partnerships with global remote-first companies or Japan-based tech teams. I believe quality is engineering, not just validation. Outside of code, I'm passionate about electronics and 3D printing—hands-on hobbies that keep my curiosity sharp and my problem-solving approach grounded.

Experience

Pagar.me

5 years 9 months

Staff QA Engineer

January 2023 - Present (3 years 5 months)

- Lead quality strategy for the payments business unit, reducing critical production incidents by 40% in 6 months through automated quality gates.
- Pioneered AI-augmented testing: integrated local LLMs (Ollama, LM Studio) and AI agents (CrewAI, n8n) to generate and review test cases, cutting test design time by 35% and expanding edge-case coverage.
- Optimized CI/CD pipelines and refactored test pyramid architecture, reducing infrastructure costs by up to 50% while maintaining coverage.
- Mentor 3 Senior QAs on test architecture and strategic thinking; previously guided 3 Juniors to Mid-level and 1 professional to Engineering Management.

Test Engineer

September 2020 - December 2023 (3 years 4 months)

Optimized CI/CD pipelines and restructured the test automation strategy, shifting to a balanced test pyramid. Reduced infrastructure costs by up to 50% and accelerated feedback loops while increasing test reliability.

Tech Lead QA

October 2021 - January 2023 (1 year 4 months)

- Led a squad of 7 QA engineers across 3 product teams; established a technical progression framework adopted company-wide.
- Architected a device farm for POS testing, reducing manual validation effort by 60% and accelerating firmware release cycles.
- Integrated static security analysis (SonarQube, MegaLinter, SDAT, MobSF) into CI pipelines, catching 90% of critical vulnerabilities pre-merge.

PagSeguro PagBank

QA Engineer

September 2019 - September 2020 (1 year 1 month)

São Paulo

Ensured quality and reliability for high-volume payment products in a regulated fintech environment. Streamlined QA processes by aligning manual and automated testing with Agile delivery. Contributed to release stability, compliance readiness, and reduced rework through standardized acceptance criteria and cross-squad alignment.

Goninfo (Autonomo)

Analista Programador / Infra Estrutura

July 2013 - September 2020 (7 years 3 months)

Delivered end-to-end IT solutions for SMBs and individual clients. Managed infrastructure, network maintenance, technical support, and custom application development. Built systemic delivery expertise, stakeholder alignment, and agile problem-solving in resource-constrained environments.

Concrete Solution (accenture)

QA Chapter Lead

April 2017 - September 2019 (2 years 6 months)

Greater São Paulo Area

Technical QA leadership for digital media projects serving enterprise clients. Defined end-to-end test strategies (UI, performance, load, stress, unit) embedded in Agile workflows. Built and maintained automation frameworks using Ruby, Cucumber, Appium, and Calabash, integrated with Jenkins CI.

Championed Specification by Example and Agile Testing practices, raising quality maturity and dev-QA collaboration across teams.

Stefanini

Analista de Teste Jr.

February 2016 - March 2017 (1 year 2 months)

Junior Test Analyst consulting for IBM (Itaú banking project). Executed functional testing and introduced initial automation in a highly regulated banking environment. Operationalized IBM Rational tools (RTC, RQM, RFT) to ensure requirements traceability, critical test coverage, and delivery auditability.

J.L. Da Silva Informatica EPP

Técnico de Informática

January 2012 - July 2013 (1 year 7 months)

Praça Padre João Alvares 185, Sala 12 Centro Itaquaquecetuba

Provided hardware/network maintenance and technical support for SMBs and end-users. Managed client onboarding, troubleshooting, IT solution deployment, and operational tasks (cash flow, tool research). Laid the foundation for infrastructure understanding, end-user experience awareness, and priority management under pressure.

Education

Universidade Virtual do Estado de São Paulo

Engenharia da Computação, Engenharia da Computação · (2018 - 2023)

Universidade Paulista

Pós Graduação em Engenharia de Software, Tecnologia da Informação · (2015 - 2016)

Universidade Paulista / UNIP

Bacharel em Sistemas de Informação, Information Technology · (2010 - 2013)
